Implementing a New Mathematics Curriculum Based on Genetic Constructivism

Edited By **Nad'a Vondrová, Ladislav Kvasz**

This book shows the transformative power of genetic constructivism in mathematics education, exploring how research, practice, and policy converged to drive educational innovations in the Czech Republic can offer valuable insights into the evolution of mathematics teaching on an international scale. Encouraging readers to critically assess their own teaching methods, this is the ideal resource for researchers, educators, and policymakers seeking innovative strategies to enhance mathematics education.
